Cuma 10 - Wall - Bronze - 15W LED

DESIGN BY :
RobertoPaoli
2013

MATERIALS :
Aluminium, thermoplastic

DESCRIPTION :
"This project is intended to achieve a healthy balance, understood as proportion in forms and a relationship between materials and technology. To design a form that is not in fact a form but substantially becomes a garment for light, I had recourse to pure geometry: two planes that meet in space, draw a line and nothing else". Materials: painted aluminium structure, injection-moulded thermoplastic screen.

Light emission
