## TABLE SERIES

The table series includes the Super-Elliptical ${ }^{\text {TM }}$, the Super-Circular ${ }^{\text {TM }}$, circular, square and rectangular tables designed by Piet Hein, Bruno Mathsson, and Arne Jacobsen. The most prominent member of the series, the SuperElliptical table, was inspired by the designer Piet Hein's solution to a traffic problem at Sergels Torg in Stockholm: A super elliptical roundabout. This variation of an oval possessed some attractive qualities and looked surprisingly harmonious no matter the size. Bruno Mathsson and Arne Jacobsen contributed to the base design of all the tables. The tables come in a wide variety of shapes and sizes.

## DESIGN

Piet Hein, Bruno Mathsson and Arne Jacobsen, 1968.

## DESCRIPTION

Table Series designed by Piet Hein, Bruno Mathsson and Arne Jacobsen, manufactured by Fritz Hansen.

The table tops consist of a 22 mm laminated chipboard in white, or in beech, walnut or as well as black linoleum with bevelled edge profiles. On all the laminated and linoleum table tops, the edge is a matt polished aluminium profile. The beech and oak veneered tables have a wooden edge banding. The walnut tables come with either matt polished profile or veneered wooden edge banding. All veneer tops are provided with a lacquer coating.

Depending on the shape of the table there is a choice of 3 types of bases: span legs in chromed steel, available in two heights $(72 / 74 \mathrm{~cm}), 4$ or 6 star base in satin polished aluminium foot and a satin chromed/chromed steel pedestal, or shaker base in satin polished aluminium.

The table series is available in many different shapes and sizes. The series consists of coffee tables, dining-/work tables and bar tables.

## PIET HEIN (1905-1996)

The rational idealist. Piet Hein was neither an architect or furniture designer but a philosopher, poet, mathematician etc. He created the Super-Ellips as a new oval shape for the creation of Sergels Torg in Stockholm. In cooperation with the Swedish designer Bruno Mathsson he later used the shape to make the Super-Elliptical table series, which Fritz Hansen put into production in 1968.

## BRUNO MATHSSON (1907-1988)

Bruno Mathsson - Swedish and internationally renowned designer and architect. As an advocate of an idiom characterized by simplicity, beauty and elegance, he used the same principles also in the furniture he designed. Mathsson's furniture was innovations in both technology and design, and his production methods involved bending of laminated wood. Although his designs comes from the 1930s and 1940s, his furniture is also among the classics in our time. In Denmark he designed in 1966 PH Super-Elliptical table series in cooperation with the Piet Hein.

## ARNE JACOBSEN (1902-1971)

The cooperation between Arne Jacobsen and Fritz Hansen dates back to 1934. But it was not until in 1952 a breakthrough came with the Ant ${ }^{\text {TM }}$. It was succeeded by the Series $7^{\text {m }}$ in 1955, where he and Fritz Hansen's names became a part of the world furniture history. Arne Jacobsen was very productive both as an architect and designer. When he in the late 1950s designed the Royal Hotel in Copenhagen, he designed the Egg ${ }^{\text {™ }}$, the Swan ${ }^{\text {TM }}$, the Swan sofa ${ }^{\text {TM }}$ and Series $3300^{\text {tM }}$ for the same project. The significance of Arne Jacobsen's buildings was less appreciated, but his furniture and other design work have become national and international heritage.
