

Action:

You need a slotted screwdriver or similar.

Products:

4 pcs. plastic glides (in the type you need.)

Action:

Place the screw driver CAREFULLY and press it in between the glider and the feet of the chair.
Be careful not to scratch the chair and feet.

Action:

When the screwdriver is between the feet and the glider – angle the screwdriver away from the feet/chair (to avoid damaging the feet).

The glider should pop right off.

Action:

Place the new glider on the floor, with the mounting side upwards.

Place the foot on top of the glider

Action:

When the glider is placed directly under the foot.

Add pressure on the seat – the glider will then pop onto the base.

Finished product:

The glider is now attached.

In the picture, you see the Beetle felt glider.
