ARCS WALL SWITCH

DESIGN BY MULLER VAN SEVEREN

HAY

- GENERAL INFORMATION -

TECHNICAL DATA

This product is fitted with an E14 (EU) or E12 (US) bulb fitting. HAY recommends using this product with a LED bulb.

FITTING TYPE | LED E14 (EU) or E12 (US)

POWER (W) | 5-8W

COLOUR TEMPERATURE | Warm white

HAY will not accept any responsibility for any accidents, injuries or damages that occur due to the use of incorrect bulbs.

ATTENTION

Ensure that the power supply to the circuit has clearly been turned OFF before installing the product. In some countries, electrical installation must be carried out by authorised electricians/contractors; please check with your local authority for guidance.

The product must not be modified in any way. HAY accepts no responsibility for any products that have been modified or tampered with. If the external flexible cable or cord of this luminaire is damaged, it should be exclusively replaced by a qualified electrician in order to avoid an electrical hazard. This lamp is designed for indoor use only.

CARE AND MAINTENANCE

The product can be cleaned with a soft damp cloth and mild detergent, or a dry microfibre cloth. Do not use alcohol or any other solvents to clean the product and avoid using abrasive or rough sponges. Ensure that the power supply has been turned OFF before cleaning the product.

- PARTS -

Shade

Junction box

Backplate

UK converter

Top and side
mounting screws

Plastic plug

Wall plugs and
screws

1.

Unpack all the parts and check that you have received all the parts listed. Before installing the lamp, make sure that the power is turned off. Mark the position of where the lamp should be placed on the wall and drill two holes using the correct type of drill for the wall you are drilling into.

The holes on the backplate can be used as guides, to ensure the correct distance between the holes.

2.

Insert the wall plugs. Ensure you use the correct type of wall plug for the type of wall the lamp is to be mounted on. Once the wall plug is in place, you are ready to mount the backplate with the included screws.

3.

Place the junction box over the backplate, before inserting and fastening the supplied mounting screws on each side of the junction box. Make sure it is fixed firmly in place. Take care not to overtighten the screws, as this could damage the threads.

4.

Place the lamp shade carefully on the junction box. Place the shade so that it sits behind the bottom tab on the mounting bracket, and ensure it sits in place. Move the shade in towards the wall and align the top screw with the top tab of the junction box.

5.

Tighten the top screw carefully, until the shade sits firmly up against the wall.
When the top screw is tightened, the bottom of the shade pulls upwards and locks behind the bottom tab of the mounting bracket. Once this step is done, the shade should sit firmly in place.

6.

Ensure that the power is off and screw an E14 bulb into the bulb fitting.

7.

For UK customers, insert the EU plug into the converter provided. Close the converter over the EU plug with the pins secured in the internal spring clip contacts. Screw the converter together to ensure the UK plug is secure.

8.

Turn the power back on and test that the lamp is working.

OPTIONAL

This lamp is sold with an trailing cable. If the lamp is to be mounted directly onto a power outlet/junction box, the trailing cable can be removed and the exit hole plugged with the included plastic cap. This task should exclusively be performed by a qualified electrician in order to avoid an electrical hazard. HAY will not accept any responsibility for any accidents, injuries or damages that occur due to incorrect wiring.

- CARE & MAINTENANCE -

Our Care & Maintenance offers guidance for optimal maintenance of your HAY product. It includes advice and instructions on cleaning and caring for specific materials to prolong the life of your lighting.
