

Bolt Shelving - 2000 x 3 Shelves

Lennart Ebert

Bolt by Lennart Ebert for **Nine** is a range of shelving units with a simple and utilitarian aesthetic. They are constructed from two simple elements – folded sheet steel shelves and oak uprights.

The shelves wrap around the upright to give the unit strength and stability, and the screw and thread embedded into the uprights allow simple, tool-free assembly.

Bolt is available in four sizes, ranging from low shelves for the hallway or televisions, to larger units that are suitable as sideboards or bookshelves.

Model Number - 199023 / 199024 / 199025
