

1. indicate two points for the brackets _ in one vertical line with a 400mm distance in between
2. choose the appropriate wall plugs according to your type of wall _ wall plugs are not included
3. split the wall bracket in its two parts : back and front of bracket need to be separated parts !
4. screw the backpart of the wall bracket into the wall screw _ see step 4 _ mounting of bracket
5. insert the backpart + assembled screw into the wallplugs
6. position the lamp in the brackets
7. make sure to place the ring above the upper wall bracket
8. screw the frontpart of the wall bracket on the backpart _ the little washers need to be in between the two bracket parts _ two persons needed
9. option 1 _ do not screw the brackets very tight, to make sure the lamp can turn 180°
option 2 _ screw the bracket tight to hold the lamp in a fixed position
10. screw the brass ring off the lamp socket _ place the glass lamp shade carefully over the socket _ screw the ring back on the socket until the lampshade is fixed _ take care !
